

Maturity Overall Score Calculation

Please mark the level you reached in each of the ten dimensions. Take each level from the corresponding dimension questionnaire.

Dimension	Level 1 Initial	Level 2 Emerging	Level 3 Defined	Level 4 Managed	Level 5 Optimized	N/A
Dimension 1: Data Collection Process	☐	☐	☐	☐	☐	—
Dimension 2: Data Management — Governance CORE	☐	☐	☐	☐	☐	—
Dimension 3: Data Management — Infrastructure	☐	☐	☐	☐	☐	—
Dimension 4: Data Provenance CORE	☐	☐	☐	☐	☐	—
Dimension 5: Data Access CORE	☐	☐	☐	☐	☐	—
Dimension 6: Data Analytics Environment	☐	☐	☐	☐	☐	—
Dimension 7: Data Enhancement — Augmentation	☐	☐	☐	☐	☐	☐
Dimension 8: Data Enhancement — Enrichment	☐	☐	☐	☐	☐	☐
Dimension 9: Data Model CORE	☐	☐	☐	☐	☐	—
Dimension 10: Data Dictionary CORE	☐	☐	☐	☐	☐	—

TOTAL MATURITY SCORE

Add up your ten dimension levels. The total runs from 10 to 50. It is the figure to quote when your result is compared with other assessments.

AVERAGE MATURITY

Divide the total by the number of dimensions you answered (10, or 8 if you marked Dimensions 7 and 8 as not applicable). Keep one decimal, which is what shows progress year on year.

YOUR EHDS BASELINE

Write down the **lowest** level you reached across the five core dimensions marked **CORE**, namely 2, 4, 5, 9, and 10. These are what a Health Data Access Body needs from you, so the weakest of them is what limits you today.

YOUR NARRATIVE

A short supporting narrative is expected for each dimension: the practices and tools behind the score, recent improvements, and the gaps that explain the lower scores. The evidence lines on each questionnaire give you the material.

Level 1 Initial Starting out · 1 Point	Level 2 Emerging Written down · 2 Points	Level 3 Defined In practice · 3 Points	Level 4 Managed Measured · 4 Points	Level 5 Optimized Improving · 5 Points
--	--	--	---	--

How to read your result. Your ten dimension levels together form your maturity profile, and that profile, not a single number, is the useful result. The two dimensions with the lowest levels are where the next improvement will pay off most. **Dimensions 7 and 8 (Data Enhancement)** describe added value rather than an entry requirement for the EHDS; if they do not apply to your organization, mark N/A.

Why the core dimensions matter. Governance (2), Provenance (4), Access (5), Data Model (9), and Data Dictionary (10) are the areas a Health Data Access Body relies on to accept, describe, and pass on your data. The obligation for data holders to make data available under Chapter IV of the EHDS Regulation (EU) 2025/327 applies from 26 March 2029, with genomic, molecular and clinical trial data following from 26 March 2031.

This is a self-assessment. The model is applied at organizational level, so one assessment per data holder is expected; a second is only needed where maturity differs markedly between data domains, for example, clinical versus genomic data. It is not a certificate and not the EHDS data quality and utility label.
